

SULFURIC ACID

Plant Process Component Solutions

A WORLD LEADER IN CATALYST SUPPORT MEDIA AND TOWER PACKING

CERAMIC TOWER PACKING & COLUMN INTERNALS

- Christy Catalytics supplies a complete range of ceramic tower packing for sulfuric acid plants. Our products meet all applicable ASTM standards and have been installed by major sulfuric acid manufacturers worldwide.

BED SUPPORTS FOR CONVERTER VESSELS

- Christy ceramic PROXSVERS® are a low dP, high capacity bed support for use in converter units.

- Christy also supplies quartz rock for use in converter units.

PLASTIC TOWER PACKING FOR GAS COOLING TOWERS & BISULFITE TOWERS

- Christy offers a wide range of plastic tower packing and associated internals in all types and materials.
- Packed bed analysis and engineering is available to determine the best type and size for your application — troubleshooting and debottlenecking analysis can help achieve optimal packed bed performance.

MIST ELIMINATION

- Christy offers a complete line of mist elimination and filtration products for sulfuric acid applications including mesh pad mist eliminators, candle filters, and coalescing media.
- We supply mist elimination equipment in a wide range of materials including metals, thermoplastics, and polymer co-knits.
- Whether replacing existing equipment or upgrading for additional capacity or efficiency, Christy can supply the products needed to ensure optimal performance.
